SUBJECT: Vulcan Pit

On August 8, 1977, I made an inspection of Gary Land Development and found that the Vulcan Pit to the west of the Gary Land Development site was still leaching into the Gary Land Development Pit. Upon closer examination, I found the Vulcan Pit nearly full of liquid and no apparent sign of any attempt to fill in the pit. I asked Mr. Hagen, the Gary Land Development Supervisor, if he has noticed any activity around the Vulcan Pit and he said, "No," and that he thought they were still using it.
